9:30: Shawnee County Health Department: Derik Flerlage, Infectious Disease Division Manager.

- Masks: Surgical masks are better protection than cloth masks. Cloth masks should be 3-ply if possible and washed daily.
- Surgical grade mask and face shield worn together is considered full PPE. It's important to know that PPE only protects the wearer, it does not protect any persons the wearer is in close contact with.
- Close contact is considered within 6 feet or less, for a cumulative time of 10 minutes or more within 24 hours.
- Isolation = for a person who is symptomatic or positive, 10 days.
- Quarantine = for a person who has been exposed and is asymptomatic, 14 days. However, quarantine can go on longer if they are a household contact, based on when the symptomatic person recovers. See guidance: <https://www.coronavirus.kdheks.gov/DocumentCenter/View/1086/Isolation-Quarantine-Release-Graphic-KS-PDF---8-24-20>
- We have not seen in SNCO cases where people are being re-infected. CDC guidance is that people who have recovered can interact with others for 90 days as long as they are asymptomatic. But they do need to continue to use all safety precautions.
- Gatherings: While they are strongly discouraged, it is not always possible. Individuals need to evaluate their own level of risk to make a decision on gatherings. Remember that your decisions can affect people way outside of your direct circle. People are discouraged from gathering with people outside of your normal circle when possible.

10:00 Community Connections Final Rule Guidance: LaTonia Wright, Russell Bowles, and Colin Rork, KDADS Community Connections Team.

- Final Rule Recap
- Final Rule Implementation Guidance, clarification and trends.
- Heightened Scrutiny Guidance
- Additional Resources and Guidance
- Q&A Session

Guidance from CMS: *Evidence should focus on the qualities of the setting and how it is integrated in and supports access of individuals into the broader community via the setting's policies and procedures and how the setting supports individuals' rights and is consistent with their individual person-centered service plans.*

- See attached presentation

CDDO Updates/Reminders:

- Tracing Assessment: Complete for contacts 48 hours prior to symptoms/testing
- Persons should quarantine for 14 days if close contact with a positive case.
- The SNCO Health Department is following the 10 minute guidance from KDHE.
- Group gathering/holidays: We encourage you to stay within your own group as much as possible
- PPE inventory: Providers need to stay on top of keeping an inventory. Looking online is the best option. Order supplies early knowing there will be shipping times.
- If a person is being tested, the CDDO needs to be notified right away. If positive the provider needs to submit tracing right away.
- If positive, complete a CIR/AIR. We want TCM's to complete them.
- Affiliate Agreements are due 11/15/2020.
- Affiliate Satisfaction Survey. The last day to submit a response is 11/10/2020.
- We are recruiting for the Council of Community Members. Send nomination forms to Coleen Hernandez.
- If you were in attendance via telephone, you may send an email to churla@snccdo to be credited for attendance.

Training Opportunities/Resources:

- December 10, 2020, 8:30 – 12:30 CDDO Training Session One (CDDO Overview, Article 63, BASIS Assessments, Status Action Forms)
- January 26, 2021, 1:00 – 4:00 CDDO Training Session Two (BCI, Transition Checklist)
- Email churla@snccdo.org to sign up

Next Affiliate Meeting:

December 9, 2020
